

# Diego Palominos

Cloud Architect & Software Engineer

diego@eleva.school | diegopalominos.dev | [www.linkedin.com/in/diego-palominos/](https://www.linkedin.com/in/diego-palominos/) | [github.com/betterjam](https://github.com/betterjam) | Valparaíso, Chile · Remote worldwide

## SUMMARY

---

Cloud architect and full-stack software engineer with 12+ years building event-driven systems on AWS. I turn legacy platforms into cloud-native, high-availability architectures: multitenant SaaS, hybrid cloud/on-premise commerce, real-time data pipelines. Founder of Eleva (Startup Chile Ignite 2020 winner). Deep in TypeScript/Node.js, C#.NET Core, Angular, AWS CDK, and CI/CD automation.

## PROFESSIONAL EXPERIENCE

---

### Lead Software Architect & Full-Stack Engineer, Electronic Payments

Feb 2024 – Present | Contract | Remote

- Spearheaded the transformation of legacy systems into a cloud-native, event-driven architecture, enabling real-time data processing, high availability, and future AI integration.
- Designed and deployed a fully automated AWS eCommerce infrastructure using CDK and Projen, supporting ECS clusters, RDS (PostgreSQL/MySQL), Redis, OpenSearch, and RabbitMQ.
- Built a custom asynchronous communication middleware in .NET Core, enabling seamless integration between an on-premise POS and Magento (event-driven, domain-driven design, event-sourced catalog, CQRS).
- Architected and delivered a modern CI/CD pipeline for a traditionally manual project, streamlining deployments, enabling scalability, and improving operational visibility.
- Deployed SymmetricDS in a clustered AWS environment, ensuring robust and scalable data synchronization across services.
- Enabled junior developers to contribute meaningfully to complex systems by creating scalable workflows and establishing high development standards.
- Acted as hands-on architect, full-stack engineer, DevOps lead, and mentor across the entire platform lifecycle.

### Founder & Platform Architect, Eleva (eleva.school)

2017 – Present | Founder | Valparaíso, Chile · Remote

- Founded and operate a multitenant SaaS platform used by schools for 360-degree performance evaluations and improvement plans; winner of Startup Chile Ignite (2020).
- Architected the full platform: C#.NET modular API on ECS Fargate, Angular SPA on S3 + CloudFront, PostgreSQL on Amazon RDS, all provisioned as code with AWS CDK and Projen.
- Built CI/CD with AWS CodePipeline (GitHub via CodeConnections) covering infrastructure and applications across dev/qa/prod environments.
- Designed the event-driven, multitenant domain model and the operations tooling, including a control panel that renders the live architecture from deployed CloudFormation and schedules environments down outside school hours to control cost.
- Integrating AI assistant capabilities while keeping decision-making functions deterministic and auditable.

### Senior Full-Stack Software Engineer, GRUBBRR

Apr 2022 – Aug 2023 | Contract | Boca Raton, Florida, USA · Remote

- Participated in requirements gathering to solidify prerequisites and determine the best technical solution for business needs.
- Reviewed code, debugged problems, and corrected issues on the C# .NET Core backend (GraphQL, gRPC, event-driven design).

- Created and updated Azure Cosmos DB database designs and data models.
- Developed the front-end of the Clover SMB product using Angular 13.

### Software Engineer, Freelance

Jan 2014 – Jul 2020 | Full-time | Valparaíso Region, Chile · Remote

- Delivered front-end projects in Angular (versions 2 through 11) and React for clients across industries.
- Built APIs in Node.js, .NET Core, Java JEE, and Spring Boot.
- Designed and maintained AWS cloud architectures for MVP deployments.
- Wrote unit tests to sustain high code coverage; troubleshoot, tested, and refactored software to improve efficiency.
- Provided professional services and support in dynamic work environments.

### PHP Full-Stack Developer, Centro Científico Tecnológico de Valparaíso (CCTVal)

Feb 2013 – Jul 2014 | Part-time | Valparaíso, Chile · On-site

- Developed and managed databases using PHP, ORM, and SQL.
- Reviewed code, debugged problems, and corrected issues in research-supporting web tooling.

## EDUCATION

---

### Bachelor's Degree in Computer Systems Engineering

Ingeniería de Ejecución en Sistemas Computacionales — Universidad Técnica Federico Santa María (UTFSM), Valparaíso, Chile

## SKILLS

---

**Cloud & Infrastructure:** AWS (ECS, Fargate, Lambda, RDS, S3, CloudFront, Route 53, EventBridge, OpenSearch, ElastiCache/Redis), AWS CDK, Projen, CloudFormation, Docker, CI/CD (CodePipeline, CodeBuild), Infrastructure as Code

**Backend:** C#, .NET Core, Node.js, TypeScript, NestJS, Java (JEE, Spring Boot), PHP, GraphQL, gRPC, REST

**Architecture:** Event-driven architecture, event sourcing, CQRS, domain-driven design, microservices, multitenancy, distributed systems

**Frontend:** Angular (2–13), React, TypeScript, JavaScript, HTML, CSS

**Data & Messaging:** PostgreSQL, MySQL, Azure Cosmos DB, Redis, OpenSearch, RabbitMQ, SymmetricDS

**Commerce:** Magento 2, Hyvä, POS integrations, payments

## LANGUAGES
